

We had a fantastic start to term 3. We began our space topic and learnt so many interesting facts. Did you know that Neil Armstrong had a student pilot's license on his sixteenth birthday but his was too young to have a car driver's license? Have a look at the following slides to find out more about our learning throughout term 3,

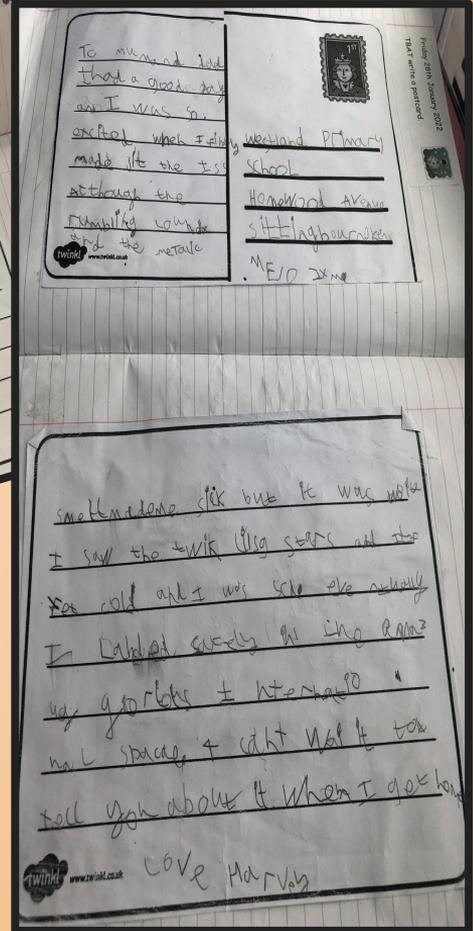

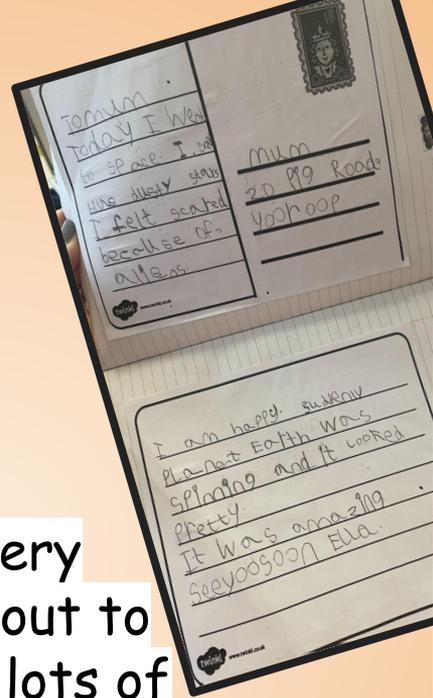

Wow! What an amazing and busy term we have had!

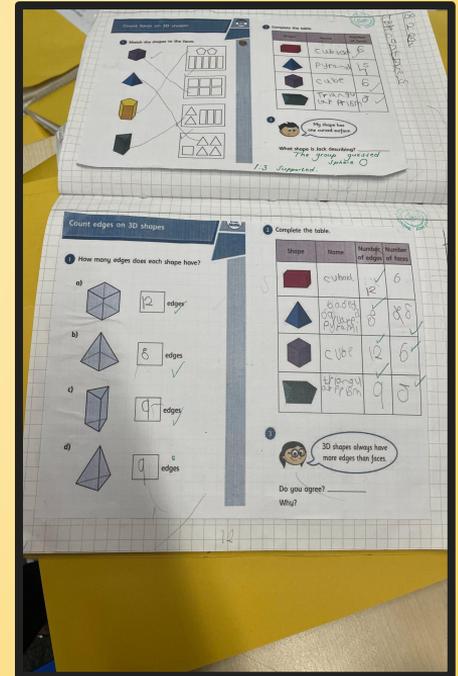

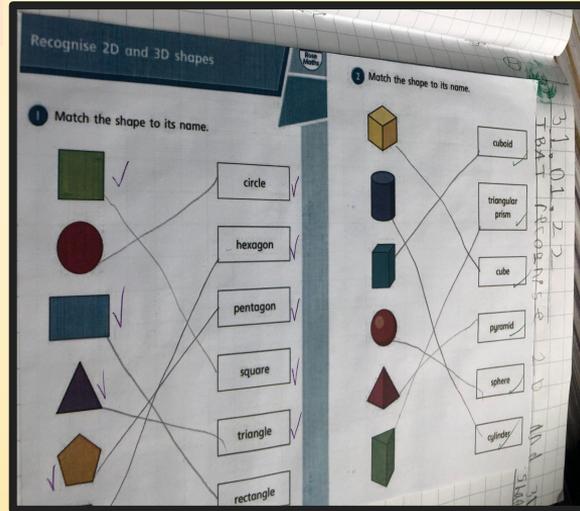

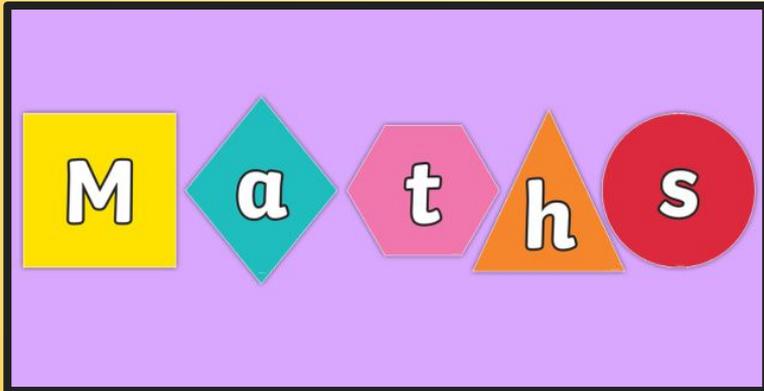

GREETINGS FROM SPACE

English

In English, Year 2 have been working very hard, imagining they are astronauts about to embark on a journey to space. We had lots of fun discussing our emotions and feelings as we took off in our spaceship leaving behind our family and friends. The children also had the opportunity to use lots of exciting vocabulary in the postcards we sent to our loved ones from space.

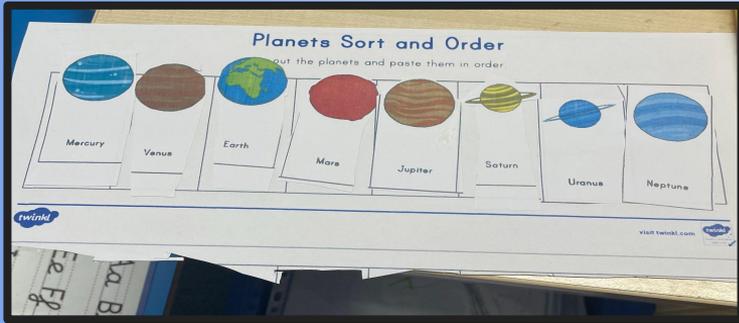

In Maths, we have been working on shape. First, we described the properties of 2D shapes and then we moved onto 3D shapes and answered questions about the amount of vertices, edges and faces each shape has. The children found this unit very interesting and they enjoyed being able to physically handle the shapes and to use them to assist them with their learning.

In Science, we have been learning about micro-habitats. The children loved venturing outside and sourcing their own materials to enable them to plan, design and make a habitat suitable for a woodlouse.

In Topic, we continued our journey through space. We have learnt about Neil Armstrong and Mae Jemison. We also enjoyed making our own rockets and drawing pictures of space

Researcher: Ella

Person's Name: Dr Mae Jemison

Lived from: 1956 to Present
year year

Most Known for:
being the first black woman in space

Person's Portrait

Five Facts

- 1 she loved Astronomy
- 2 she trained at MASA in 1980
- 3 spent 8 days in space
- 4 she is scared of heights
- 5 trained as a doctor

Researcher: Mia

Person's Name: Mae Jemison

Lived from: _____ to _____
year year

Most Known for:
being a scientist and teacher and she is famous for the First Black Lady

Person's Portrait

Five Facts

- 1 she was a teacher and she was a scientist
- 2 she can speak 6 languages and she is a doctor
- 3 but she chose to be a teacher
- 4 she went to Yoonha University
- 5 and she lives in America
